## Perfect sound that makes perfect sense.

The new AS-RI Speaker, already the recipient of Sound and Vision's Reviewer's Choice Award is a bi-pole rear channel speaker designed to complement your Audition Series home theater system.

The AS-RI is primarily designed to be wall mounted. It even comes with a simple and versatile mounting system already attached to the speakers. Additionally, there's an insert for an optional wall mount bracket called the Macromount that will provide additional flexibility in your installation if required.

Dual 1" Teteron dome tweeters in a bi-polar configuration will provide clear extended high frequencies, and the Injection Molded Polypropylene 5-1/2" woofer provides authoritative bass response down to 80Hz. The AS-RI is recommended for use with any Audition or SCT Series product or other branded products.

The AS-RI is finished in silver, an exact match to the Audition series front baffles. The AS-RI comes with a full faced, black cloth removable grill.

Sound and Vision  
Reviewers Choice Award 2003
